Conference Background

Fisheries and aquaculture offer ample opportunities to reduce hunger and improve nutrition, alleviate poverty, augment economic growth and ensure better use of natural resources. Aquaculture is the fastest-growing food production sector and has the potential to produce the fish needed to meet the demands of a growing population. The contribution of the Indian fisheries to the global food basket is substantial. India is the 3rd largest fish-producing country and is 2nd largest in aquaculture production. The Blue Revolution in India demonstrated the importance of the Fisheries and Aquaculture sector. The sector is considered as a sunrise sector and is poised to play a major role in the Indian economy in near future. In the recent past, Indian fisheries have witnessed a paradigm shift from marine-dominated fisheries to inland fisheries. However, the sector is facing challenges due to climate change, pollution, water abstraction, loss of biodiversity, overfishing, unmanaged aquaculture expansion. etc. Conservation and sustainable use of these resources is a prime challenge. In this scenario, this seminar will deliberate the Priming Indian Fisheries in Attaining Sustainable Development Goals.

Professional Fisheries Graduates Forum (PFGF)

The Professional Fisheries Graduates Forum (PFGF) was conceptualized in 2001 as a de facto national body of Fisheries graduates of India and was registered in the office of Charity Commissioner, Mumbai under the Society registration Act on 14th of February 2002. During its initial days after inception, the forum received the much needed support and guidance from Dr. S. Ayyappan, the then DDG (Fisheries), ICAR and several other renowned scientists and educationists such as Dr. Panjab Singh, former DG, ICAR, Dr. H.P.C. Shetty, Dr. K. V. Devaraj, Dr. J.V.H. Dixitulu. In the next two decades, the forum has been working in close association with fisheries colleges and research institutions on various aspects concerning fisheries education, research, placement, career guidance etc, and has carved its own niche in the fisheries sector as a responsible organization dedicated to the cause of fisheries graduates. The forum functions with its headquarters at ICAR-Central Institute of Fisheries Education, Mumbai – the national fisheries university, and has regional chapters in 12 states across the country with over 2500 members enrolled.

Inland Fisheries Society of India (IFSI)

It is one of the oldest scientific societies in India. The Society promotes fisheries research and development in Asia. It regularly organizes national and international scientific events and has the distinction of uninterrupted publication of Journal of the Inland Fisheries Society of India, a leading journal in the field of fisheries, since 1969.

ICAR-Central Inland Fisheries Research Institute

This is the first Institute in India in the field of inland fisheries research, extension and training, and celebrating 75 years of dedicated service to the nation. The Institute has an impressive track record of providing research support for the country's inland fisheries development since its inception in 1947. Technologies developed by the Institute have paved the way for aquaculture development and blue revolution, sustainable production enhancement from reservoirs and wetlands, health management of rivers and associated ecosystems, fisheries resource assessment and database development, human resource development of the country, etc.

All India Agricultural Students Association (AIASA)

It is an organization represented by professionals of present-day and ex-students of Agriculture, Fisheries, Veterinary Science, Dairy, Horticulture, Forestry, Home Science, Sericulture, ABM and other allied sectors. AIASA is registered under Societies Registration Act 1860. This Association was formally launched on 10th May 2011 by the then Hon'ble Union Minister of State for Agriculture and Farmer's Welfare. It is established with a mission of strengthening the voice of passionate agro-professionals, veterinarians, at the state, national, and international levels. AIASA-Fisheries Chapter envisages a common platform for Fisheries graduates and Bureaucrats to work together, towards the development of the fisheries sector overall.
